

SCE HAS AN EMR OF 0.831 WITH ZERO LOST WORK DAYS AND ZERO ACCIDENTS SINCE 2008.

TEMPORARY PERSONNEL ISSUES NEED DEPENDABLE LABOR SOLUTIONS - SCE CAN HELP!

SCE's Personnel Support Division was formed to assist companies in meeting the challenges of an ever changing marketplace, and offers flexibility to assist clients in maintaining proper staffing levels. Whether the disparity is due to workload, multiple contract locations, fulfilling seasonal requirements or just having that "specialist" onsite, SCE Environmental Group is your support source. The advantage of using SCE is that the staff we provide have already been vetted by us on similar projects, and we know they will have the right skill sets, show up on time, and work hard - you won't have to be worried about getting a new person "off the street" without proper experience. SCE has been performing staffing support work for over 15 years.

Dedicated to the environmental, State DOT, emergency response, waste, oil and gas, and construction markets, SCE provides clients with a complete range of professional support staff to meet every project goal. Our specialists have the education, experience, licenses, and work ethics necessary to exceed your staffing expectations. SCE's specialists are available on a temporary basis, part time, or full time from one day to several months.

More recently, SCE has ramped up its staffing support for State DOT work and is providing staff to major DOT contractors for the following services: crack sealing, inlet repair, demolition, dowel work, bridge repair and reconstruction, painting, road reflector restoration, sediment control, and seeding.
